

hitplay

WHO WE ARE

We are a forward-thinking communication technology firm that takes a user-centered design approach. We create new ways for progressive organizations to build intelligent infrastructure and visual communication systems that enhance collaboration, productivity and the use of space.

WHAT WE DO

We combine five areas of expertise in one integrated offering:

- Research + Insights
- UX Design
- Systems Engineering
- Systems Integration
- Technology Adoption

THE CONNECTED WORKPLACE a proven process that analyzes the needs of users, defines the possibilities of technology and designs the requirements for business success: to deliver systems, services and a user experience that enhances knowledge sharing.

WHY HITPLAY

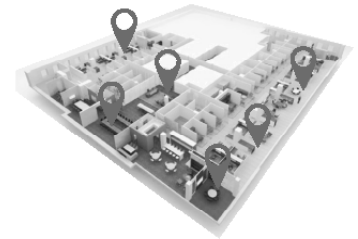

We deliver the Lowest Total Cost of Ownership for clients.

- Diverse Knowledge Base + Breadth of Experience
- User-Centered Design
- Proven Process + Technology as a Service Model
- Best-in-class Training + Support
- Transparency + Collaborative Approach
